The assertion that data is a company’s most valuable asset is only partially true. Data is important to the extent it drives business insight. Bridging data and insight is the essential challenge, and one you will see in re-emerge in the year ahead with new names such as “augmented analytics” and “explainable AI”. Embedded AI techniques facilitate a more seamless connection between data and actionable insight - the true catalyst of business value.

How is this playing out in the M&A markets? Companies adept at collecting data are increasingly aggressive acquirers of targets that facilitate the data-to-insight capability. This quarter’s headline transactions include Salesforce’s acquisition of Tableau and Google’s acquisition of Looker. In both cases, the transactions were promoted as a way to accelerate customers’ digital transformation initiatives as the value chain consolidates around particular use case. The market continues to be hot and we expect more consolidation will occur. It would be unsurprising to see the next wave of targets include such standalones as Alteryx, Cloudera, and Talend.

Within private markets, we observe many of the same acquisition priorities. Pure-play data analytics firms make attractive acquisition targets, especially where the solution ultimately solves a problem from the business organization. Moreover, domain knowledge matters and targets built around a specific vertical or horizontal garner particular attention. The ultimate prize is an integrated solution delivering data-to-insight-to-action as fluidly as possible.

Tech Giants Advance Leadership Positions and Advisory Firms Enter the Ring

Driven by further advances in the market, public technology leaders have shifted their attention to large-scale acquisitions to spur market domination, while private consulting firms look to modernize with advanced analytics and big data capabilities in the rapidly changing advisory landscape.

- Looker develops a business intelligence and big data analytics platform designed to bring better insights and data-driven decisions to every business
- The combination of Looker and Google Cloud will offer an elite data management and analytics platform for businesses as they drive digital transformation
- Tableau Software develops an analytics platform that empowers individuals and companies to get rapid insights and make impactful, data-driven decisions
- The acquisition brings together the world's #1 CRM and #1 analytics platforms to revolutionize customers' digital transformations
- Cray develops the world’s most advanced supercomputers and provides data analytics and artificial intelligence solutions
- The acquisition accelerates HPE’s strategy to tackle customers’ most data-intensive challenges by combining deep supercomputing talent and cutting-edge technologies
- Kernel Analytics is a data science consultancy specialized in advanced analytics
- The acquisition bolsters the capabilities of BCG GAMMA, BCG’s analytics arm that leverages world class analytics and AI to unlock business performance in global enterprises
- Xerva is a data analytics and data warehousing service provider
- This acquisition positions Eide Bailly as an innovative and forward-looking business advisory firm in the CPA space as they look to expand deeper into data and analytics
- Kernel Analytics is a data science consultancy specialized in advanced analytics
- The acquisition bolsters the capabilities of BCG GAMMA, BCG’s analytics arm that leverages world class analytics and AI to unlock business performance in global enterprises
- Cervello is a business analytics and data management consultancy, with over 100 consultants and multi-year relationships with blue-chip clients
- Cervello’s expertise in big data, cloud, and data platforms will enable A.T. Kearney and Cervello to jointly develop more robust tools and customized solutions for clients

| 6/13/2019     | Lattice        | backed by Dun & Bradstreet  | - Lattice Engines is the leading AI-powered customer data platform (CDP) enabling B2B organizations to scale their account-based marketing and sales programs  
                      - The transaction will position Dun & Bradstreet as a leading provider of integrated data and analytics solutions for sales and marketing professionals |
| 6/12/2019     | Medidata       | backed by Dassault Systems  | - Medidata develops and markets software and provides digital transformation services for clinical development, commercial, and real-world data intelligence  
                      - The transaction is all-cash at a price of $92.25 per share for Medidata, totaling ~$5.8 billion |
| 6/10/2019     | Tableau        | Salesforce                  | - Tableau Software develops an analytics platform that empowers individuals and companies to get rapid insights and make impactful, data-driven decisions  
                      - The acquisition, valued at $15.7 billion, brings together the world’s #1 CRM and #1 analytics platforms to revolutionize customers’ digital transformations |
| 6/10/2019     | Zoomdata       | backed by Marine Equity     | - Zoomdata is an analytics platform for big data and live streaming data  
                      - The acquisition of Zoomdata solidifies Logi’s position as the leader in embedded analytics, now with the richest suite of capabilities and a global partner network |
| 6/6/2019      | Looker         | Google                      | - Looker develops a business intelligence and big data analytics platform designed to bring better insights and data-driven decisions to every business  
                      - The combination of Looker and Google Cloud will offer an elite data management and analytics platform for businesses as they drive digital transformation |
| 6/6/2019      | DonorTrends    | backed by Insight           | - DonorTrends is a fundraising analysis firm that helps nonprofits use actionable data to more efficiently generate additional revenue and more effectively engage donors  
                      - The acquisition empowers EveryActions’s clients to raise more money and furthers the company’s strategy of bringing innovation in revenue generation to its SaaS products |
| 5/29/2019     | Black Mountain | backed by Stone Point Capital| - Black Mountain Systems is the leading provider of innovative workflow software solutions to credit investors and alternative asset managers  
                      - Vista’s investment in Black Mountain will help drive the company’s continued growth domestically and internationally and provide new capital to invest in Black Mountain’s software platform and data solutions |
| 5/20/2019     | Profitect      | Zebra                       | - Profitect is a leading provider of prescriptive analytics for the retail and consumer packaged goods industries  
                      - The acquisition of Profitect expands Zebra’s relevancy deeper and wider in global retail operations and advances their software capabilities |
| 5/17/2019     | Cray           | Hewlett Packard Enterprise  | - Cray develops the world’s most advanced supercomputers and provides data analytics and artificial intelligence solutions  
                      - The acquisition accelerates HPE’s strategy to tackle customers’ most data-intensive challenges by combining deep supercomputing talent and cutting-edge technologies |
| 5/8/2019      | Imanis Data    | Cohesity                    | - Imanis Data is a leader in enterprise backup and data management technology, relied upon by Fortune 500 companies to protect big data workloads  
                      - The acquisition provides Cohesity customers the broadest support for big data workloads and distributed databases |
| 5/2/2019      | Jet Global     | backed by TA Associates     | - Jet Global Data Technologies develops reporting, data and analytics, and budgeting solutions for Microsoft Dynamics  
                      - The acquisition builds on insightsoftware’s strategy to deliver a broad portfolio of market-leading reporting platforms that allow organizations of any size to easily access and distribute meaningful financial and operational data |
