IDC states worldwide revenues for Big Data and business analytics will grow from $130 billion in 2016 to over $203 billion in 2020, at a CAGR of ~12%. In addition, Forrester predicts 70% of enterprises will implement AI over the next 12 months (up from 40% in '16 and 51% in '17). This is a huge shift but a natural evolution of Big Data!

As we put the wrap on 2017 and look to 2018, who will be the winners in this AI/Machine Learning landscape? Companies that focus on specific business outcomes will be the big winners. Much like early Big Data days, the focus has been on customer insights and predicting customer behavior. However, enterprises are now looking to deploy AI across their operations from supply chain to equipment maintenance. As AI use cases widen, companies seek to better understand the complex and confusing AI solution landscape. AI solution providers that can address multiple business problems and use cases and are growing revenue at 40%+ will command the attention of the most active consolidators, while startups that require tens of millions of dollars of funding to amass their first enterprise use case will struggle to exit effectively. Clearsight believes 2018 is the year for AI M&A as strategic buyers have identified the gaps in their software and services offerings and are eager to find proven targets.

Q4 2017 acquisitions advance Splunk’s market-leading machine learning platform

Splunk ramped its acquisition activity in 2017 helping drive its stock price up 60%+ for the full year. In Q4 alone, the company completed two transactions totaling $40mm+ in value. The acquisitions of SignalSense and Rocana’s technology and IP assets fit into Splunk’s strategy of enhancing its leadership position as the #1 Operational Intelligence platform.

### Splunk Acquires Signal Sense

**Transaction Summary**

On October 17, Splunk announced it had acquired SignalSense, a privately held technology company offering cloud-based advanced data collection and breach detection solutions that leverage machine learning. These machine learning technologies are applied to signal processing and make cyber intelligence practical and effective for businesses of any size. Seattle-based SignalSense will join Splunk’s Products organization in its growing Seattle office. The acquisition was funded with cash from Splunk’s balance sheet.

**Deal Analysis**

- **Clearsight Perspective:** The acquisition of SignalSense builds upon Splunk’s ongoing strategy to further advance its machine learning capabilities and its market-leading machine data platform. SignalSense’s expertise in building modern cloud applications and applying machine learning to data complements Splunk’s product capabilities.

### Splunk Acquires Rocana Assets

**Transaction Summary**

On October 9, Splunk announced it had acquired select assets of Rocana, a privately held technology company offering analytics solutions for the IT market. A number of technical employees from Rocana will also be joining Splunk as part of the transaction, which was funded with cash from Splunk’s balance sheet.

**Deal Analysis**

- **Clearsight Perspective:** The acquisition of Rocana’s technology and intellectual property assets comes after Splunk’s recent commitment to innovate through a build, buy, and partner approach. Splunk will leverage Rocana’s assets to advance its machine data platform and machine learning capabilities. Furthermore, Rocana’s team of technical employees will strengthen Splunk’s IT Operations leadership.

### Deal Commentary

**“Splunk is the perfect platform for our team to make a big impact on Splunk’s substantial customer base”**

Brad Lovering
Chief Engineering Officer, SignalSense

**“We are thrilled to join the Splunk team and help contribute to its vision of helping customers turn data into answers”**

Eric Sammer
Chief Technical Officer, Rocana

### Other Notable Splunk Acquisitions in 2017

- **May 2017:** Splunk acquired Drastin, a provider of conversational analytics technology intended to help non-technical users gain critical business insights from massive amounts of data.

  The acquisition of Drastin expands Splunk’s search-driven analytics capabilities and enhances Splunk’s ability to provide an intuitive search experience for customers.
