If there's one word with which to describe the 2022 M&A markets, it's this: resilient. Deal professionals rightfully saw 2021 as a "hundred-year flood" water mark and expected substantially reduced volumes in 2022. Indeed, technology M&A volumes fell by 25% in total expenditure but increased 14% by number. The trajectory of 2021 was unsustainable, and a more normalized level of activity was to be expected.

Nonetheless, valuations in many segments remained above historical norms, if not quite to 2021 levels. Deals continued to print at strong multiples even amidst fairly substantial macro headwinds. Globally, we faced the first land war in Europe in half a century, an ensuing energy crisis, the strongest inflation levels in decades, and the subsequent aggressive policy response from central banks around the world. Demand never left the market as we continued to see strong interest from across the buyer landscape. Strategic acquirers and financial investors behaved aggressively in competitive auctions. Ever resilient, M&A conditions remained supportive for interested sellers.

Our clients in the Cloud, Data & Analytics world certainly benefited from resilient markets. Data intelligence consultancy [USEReady](#) raised growth capital from Abris Partners and UX research agency [AnswerLab](#) received an investment from Shamrock Capital. Digital transformation and data analytics consultancy [AustinCSI](#) was acquired by Cognizant in a deal that furthers Cognizant's ability to deliver next generation technology solutions to enterprise clients.

Turning the calendar to 2023, we at Clearsight are cautiously optimistic for a rebound year. 451 Research surveyed M&A dealmakers, 46% of whom expect an increase in M&A activity. Indeed, many of the strong tailwinds remain in place: tight labor markets, continued enterprise-level digital transformation, modernization of IT capabilities, lingering supply chain impacts, and general business agility in an uncertain market.

Sector Spotlight

AWS Overhaul: Take-Aways from re:Invent 2022

The ClearSight team recently attended AWS' signature re:Invent conference to meet with entrepreneurs and investors at the forefront of the hyperscale cloud. The AWS partner ecosystem has noticeably matured since we last attended the event in 2019 (*i.e.* before COVID moved the event to virtual). Cloud migration and enablement has become largely commoditized in the interim, and AWS itself has pivoted away from raw infrastructure (*i.e.* IaaS) to cloud-native capabilities and services more aligned to a platform (*i.e.* PaaS) model. For partners, there is a stronger focus on providing value to customers in the form of solutions and better collaboration with AWS itself as the conversation moves up the value chain into the business organization. Carving out differentiated offerings is now top of mind for partners who must navigate a maturing market, exhibiting verticalization, consolidation via M&A, and culling as AWS itself seeks to drive more value from fewer partners.

Recent commentary from 451 Research corroborates our observations, reporting that AWS aims to streamline its go-to-market strategy across all partner segments. In recent years, AWS has made moves in this direction by establishing a partner development team to create better partner capabilities and services. AWS then backed this up through its financial investments in accelerating go-to-market opportunities and its development of a dedicated sales unit to work directly with the partner ecosystem. The AWS Partner Profitability Framework, introduced at re:Invent, aims to provide even more assistance to the partner ecosystem by maximizing partners' business value based on their activities, cloud maturity, and business models. While the program has been successful thus far in attracting "long tail" partners for co-development opportunities, it remains to be seen how efficiently it can get a diverse group of partners up to speed with a common value selling proposition.

Nevertheless, the ability to deliver an integrated set of products and programs from multiple partners as one company will heighten AWS' competition with other hyperscale cloud providers, particularly Google and Microsoft Azure, who have also undergone major changes to their partner networks. The result: continued demand for partners in these ecosystems and subsequent interest from the M&A community as we head into 2023.

On the Horizon: Intelligent Automation (IA)

For years we have championed modern data capability as the precursor to business insight and agility. Massive data volumes offer promise but are hardly useful in isolation. Enter intelligent automation, a theme we expect to gain more mindshare in 2023. Intelligent automation (IA) leverages three key disciplines: artificial intelligence (AI), business process management (BPM), and robotic process automation (RPA). The introduction of AI to the IA toolkit further elevates human roles to higher value tasks as IA-enabled end-to-end processes become more flexible and resilient to shifting data streams.

It's our view that intelligent automation will emerge as the barometer of success in data-related initiatives. Scaling the capacity and flexibility of data-driven decision making across the enterprise and into higher value tasks will continue to elevate employees into more productive roles. In a tight labor market, IA drives greater productivity from employees and provides for more engaging working conditions. Services firms that specialize in this domain remain highly fragmented and somewhat scarce, particularly those focused on higher order decision automation. We expect to see IA as a force driving acquisitions in adjacent spaces, particularly in AI solutions and services. Strategic acquirers in particular will seek to blend specialized skillsets into this interdisciplinary capability that can be sold to enterprise scale clients.

M&A Activity

| Date | Target | Buyer/Investor | Summary |
|---|-----------------------------------|---------------------------|--|
| L3M Featured M&A Transactions (1 of 2) | | | |
| 15-Dec-2022 | AustinCSI | Cognizant | <ul style="list-style-type: none"> AustinCSI is a premier digital transformation consultancy specializing in enterprise cloud and data analytics advisory services The transaction furthers Cognizant's ability to deliver next generation technology solutions to enterprise clients |
| 07-Dec-2022 | Octo | IBM | <ul style="list-style-type: none"> Octo is a US-based IT modernization and digital transformation services provider exclusively serving the US federal government, including defense, health, and civilian agencies This transaction will add-on to IBM's IT modernization and digital transformation capabilities |
| 21-Nov-2022 | Bridge Business Consulting | EY | <ul style="list-style-type: none"> Bridge Business Consulting is a Sydney-based data and analytics services provider Bridge Business Consulting will help EY's Business Solutions teams enhance their ability to help clients transform their businesses through data and analytics |
| 15-Nov-2022 | Codete | Exadel | <ul style="list-style-type: none"> Codete is a Poland-based software development and consulting firm Exadel will leverage Codete's skills in engineering and HR services to grow their current engineering capabilities and expand into the European market |
| 15-Nov-2022 | Caylent | Gryphon Investors | <ul style="list-style-type: none"> Caylent is a cloud-native services business focused on helping AWS optimization Gryphon's investment will support Caylent's continued expansion of its capabilities and partnerships with AWS |
| 08-Nov-2022 | Sagence | PwC | <ul style="list-style-type: none"> Sagence is a consulting firm focused on data management and analytics This acquisition positions PwC as a leading player in data strategy and data cloud transformation capabilities, further establishing the firm as a digital business partner |
| 03-Nov-2022 | Wovenware | Maxar Technologies | <ul style="list-style-type: none"> Wovenware is a Puerto Rico-based firm specializing in software development, service design, artificial intelligence, and geospatial production Wovenware will significantly bolster Maxar's current talent as well as its software engineering and AI capabilities |
| 28-Oct-2022 | Quantmetry | Capgemini | <ul style="list-style-type: none"> Quantmetry offers a wide range of IT consultancy services along with data analytics, data science, online learning, and managed data services This acquisition will strengthen Capgemini's ability to deliver data transformation at scale and in the development of innovative products and services powered by trusted AI |

M&A Activity

| Date | Target | Buyer/Investor | Summary |
|---|---------------------------------|--------------------|---|
| L3M Featured M&A Transactions (2 of 2) | | | |
| 27-Oct-2022 | Ness Digital Engineering | KKR | <ul style="list-style-type: none"> Ness' engineering services include enterprise applications, business services, enterprise packaged applications, content management, web portal, and customer management Ness adds to KKR's global portfolio of technology investments |
| 18-Oct-2022 | Cape AI | Spatialedge | <ul style="list-style-type: none"> Cape AI offers advanced analytics, data engineering, AI modeling, and software development services This transaction will allow Spatialedge to scale its offering and solutions to large enterprises across Africa |
| 18-Oct-2022 | Bit Quill Technologies | Improving | <ul style="list-style-type: none"> Bit Quill offers cloud development, data development, staff augmentation, team management, and cloud integration services The acquisition increases Improving's annualized revenue to exceed \$250 million and will further expand its geographic reach within the Canadian market |
| 12-Oct-2022 | QVine | SilverEdge | <ul style="list-style-type: none"> QVine offers a broad array of capabilities including DevOps engineering, SysOps administration, and solutions architecture The transaction accelerates SilverEdge's ability to offer a greater depth and breadth of product and capability to core customers in the intelligence community |
| 07-Oct-2022 | Braincourt | Capgemini | <ul style="list-style-type: none"> Braincourt designs and implements business intelligence solutions with the help of data mining, data analytics, machine learning, and cognitive computing The acquisition will enable Capgemini to expand its range of services in Germany and Northern Europe |

About ClearSight

ClearSight Advisors is an investment banking firm dedicated to driving the Knowledge Economy by providing world-class M&A and capital raising solutions exclusively to growth-oriented Business Services and Technology companies. ClearSight combines deep market insights across software, services and data. ClearSight Advisors, Inc. is a wholly owned subsidiary of Regions Financial Corporation. All securities are offered exclusively through Regions Securities LLC, a registered broker-dealer and member of FINRA and SIPC.
